EARNED VALUE MANAGEMENT CONSULTING

Delivering Projects is your top priority, part of that is meeting contractual Earned Value Management (EVM) requirements.

To meet these requirements, you know you need to have a solution in place.

Our EVM consulting services can help you implement the required solution in the right way enabling you to focus on making informed decisions to successfully deliver your projects.

QUALITY   VALUE   TRUST

HOW WE DELIVER

- EVMS for the first time – Starting from scratch can be a daunting task. Our experts will help you to implement a solution that is right first time.

- Existing System Issues – We can uncover the real challenges within your existing EVM System. From there we can assess and implement the required solution improvements.

- Contractual Compliance challenges – Ensuring he EVM System complies with contractual requirements is essential. We can review systems to assess compliance against contractual requirements and propose any required improvements and solutions.

- Limited Organisational Knowledge – We are an APMG accredited training company and deliver our training online, on your site or at out training facility in Preston in the Northwest of the United Kingdom. Beyond training we offer coaching and mentoring to assist in the understanding and application of EVM metrics and trends.

OUR CAPABILITIES?

Our EVM Consulting Services consist of the following capabilities:

- Bids & Proposal Responses
- Implementation
- Analysis & Reporting
- Compliance Reviews
- MoD Compliance
- Maturity Assessments
- Maintenance Support
- Software selection
- Training

WHAT TO EXPECT FROM US

Xacom is a specialist in Earned Value Management and Project Controls and we recognise that that it won't work the same way for all implementations.

If you need an EVMS for a single project or an enterprise implementation across programs, our experts will take the time to understand your business and develop a solution tailored to your needs.

We'll provide you with a meticulously developed, right-sized solution, so your team can meet compliance requirements while improving project performance.
